

GH-1154196006

A functional landmark, incorporating principles of new urbanism, is complemented with well-thought space zoning to ensure seamless and constant transition of indoor and outdoor activities, maximize panoramic views, accessibility from all corners that blends harmoniously together with the existing, surrounding environment. A combination with greeneries, outdoor galleries and interactive spaces create a symbiotic relationship between Nordic heritage and an open opportunity for all to appreciate and experience art. A façade of Finnish wood, carved with Nordic weavings and natural wooden finishes highlights Finnish and avant garde design representing the embrace of Helsinki with international ethnicities.

Thrived as one of the world's most advanced cities, The Guggenheim Helsinki incorporates technologically innovative and ecologically responsive materials into engineer-driven design solutions, to sustain performance and lifespan longevity into the visionary reflection of its past, present and future whilst bolstering the country as the triangular center of Guggenheim Bilbao, New York and Abu Dhabi.
