

Our anticipation for this museum is to be the remarkable landmark of Helsinki and Finland itself. As a landmark, we designed a symbolic TREE ROOTS formed architecture. TREE is a symbol of nature of Finland and an object of animism. The way of this design inherits the Scandinavian design and also advances it.

This landmark is much more than remarkable: it is also the public place opened for everyone, and connecting people from various directions. TREE ROOTS form makes 360° opened space and realizes 3D, complicated circulations. In this museum, people meet people and art in various different ways which inspire their creativity.
