

CONTINUUM

With its pure and reflective contours, subtle and unsentimental, our Museum is dedicated to the celebration of Finnish ideals and its cultural history. Our vision is a Museum that will connect with people physically, sensually, and intellectually; a place that can be shared with others in openness, in wind and sunlight.

The idea that the mass appears to disappear allows the flow of the floor plates to define a deliberate morphing of the spaces, a concept that is defined more by texture and flow than by mass and materiality.

From its planted public space over the roof to the kinetic windveil bridge connecting to the park our Museum offers an experience of travelling through a series of filters to enrich our ability to connect with our surroundings.

Our aim has been to create a building that will remain vital for an audience that is ready to savour its multilayered experiences.
