

The Building in the City Skyline

Our respect paid to the existing spatial interrelations shall generate a new quality for the location.

We would like the building's silhouette to mark its place in the existing landscape, while harmoniously integrating itself with the urban context. It is important for us to retain the existing vista directions and the interrelationship of the city, the park and the harbour.

The viewing terrace of the restaurant located on the top of the newly created green hill is a keystone between the museum, a footbridge leading to the park and the future extension of the Olympia terminal deck. The external terraced inclines on the coast side and at the main entrance will serve as outdoor art galleries.

The building, like a leaf gliding from the park, is to land on the coast and become its integral part.
