

Finland is a country of thousand lakes and islands. Reflecting in water surface they soar among clouds.

Art is a reflection of outward world, which was refracted in creative activity of an artist.

Image of islands, leaving the grounds and gradually dissolving in reflection is a symbol of independent art in physical and virtual universe.

Four main structures, which have reversed cupola shape, gradually rise, following promenade rampant, which connects the town square at quay with scenic ground in the park at hill.

The variety of sites and gardens placed under the sky in different levels should be one of the most favorite places of active or calm rest.

Symbolical “forest” of pillars that gradually arises from the earth supports the coverings of semi spheres and lights up the entire complex at the same time.

L.E.Ds that are built-in the pillars allow to organize light and computer shows.
