

**DESIGN SUMMARY FOR ARCHITECTURAL PROPOSAL**

A box that measures 50 X 50 X 50 meters is to be our main building. It places itself strategically in the site on top of a plinth in order to capture the attention of the public. It is surrounded by public sculpture plazas, with one main entrance door: a “simple” huge detail that makes the building unique in the world which functions with an easy system to open one of the box’s sides entirely.

The path as key issue for the museum: a 50 meter high by 50 meter deep slot as a funnel that leads to the main entrance, which is a 2.50 meter high space. Going through it, the most important space of the museum appears: a large scale space (36 meter high, 20 meters wide and 48 meters long) as main lobby to have interventions by artists. 5 floors of galleries follow the path.
