The Helsinki Guggenheim will be part of a Creative Ecosystem. A space that cultivates, nurtures and inspires creativity. A space that is a work of art in its own right but also complements, enriches and highlights the art it exhibits.

The design of the Helsinki Guggenheim is inspired by a cluster of mussels as a fundamental part of the Baltic ecosystem, creating a complex of architecture in harmony with its environment

The environment that the landscape and building create will be one of bewilderment and discovery. An exploratory experience at a human scale, challenging delighting and educating the public and visitors from around the world. A space that effects change in Helsinki and has the capacity to change itself.

The form of the building is respectfully juxtaposed against the current cityscape, as to stand as a sculptural pinnacle of Helsinki's creativity. A structure that will inspire, challenge and promote the inspiration of creative minds.
